

TOP 5 MISTAKES CHOOSING A CONSUMER GOODS ERP SYSTEM -

Jennifer's top tips for avoiding these expensive mistakes

01

NOT FULLY DOCUMENTING THE CURRENT STATE

Interview all Stakeholders including end-users, to verify the true "as-is" - don't rely on assumptions for processes.

02

INACCURATE ROI CALCULATIONS

Engage cross-functionally to uncover potential long term and indirect benefits that have high impact.

03

FORCE FITTING TO CURRENT PROCESSES

Leverage new systems by adapting processes for scale and growth instead of customizing.

04

UNDERESTIMATING USER RESISTANCE

Balance performance features with user friendly interfaces to engage and encourage users.

05

OUTGROWING THE SYSTEM

Design in scalability requirements as a priority, to avoid costly add-ins as the team and transactions increase.

OUR EXPERT

Jennifer White is co-owner of The MJW Group®, specializing in helping B2B clients solve problems through analytical and innovative Solutions. With a decade-plus experience in manufacturing, operations, and supply chain, she excels in transforming businesses with a focus on quality, service, and delivery standards.
